

Dear Rashmi Shuklaji,

I have used the Pune Police website ( <https://punepolice.co.in>) today for registering a complaint of my lost RC/TC book of my Car for the first time and really appreciate the way the site has been designed and is very very useful. It is an extremely helpful site with all the relevant information and is user friendly.

I couldn't stop my self from browsing the entire website, even after my work was finished within no time, also found a need to share my views on this excellent work done by your team!  
(only some of the pages are missing, which I am sure would be under updation)

Very nice initiative !!!

I have also heard about the "Police Mama" = Guardian Cop for the college, which is also a very thoughtful initiative!  
Fantastic !!  
Wish you and your TEAM : All the Best!

I do know you and your team will be overburden due to the ongoing Ganesha Festival, and would be very busy controlling and avoiding any unwanted situations,  
we pray for Lord Ganesha, to help you in your mission of "SMART POLICING"

Just a thought : Could the Wassap Application (or similar) can be used for better coordination & involvement of people of Pune.  
(I am sure your team definitely have thought over it)

Thanks a lot Madam.

Regards,

Vishal Naik
