- 6) Based on user's current location which is received along with the video or image, police can also locate the information sender as well as the place where the incident has taken place.

Introduction

“Satark Punekar” Mobile Alert, is an android based application for smart phones. This application is used for sending emergency alert to Pune CCTV Command Center. The application has facility to capture a photograph or video clip. There is also facility to type description of the incident. The application automatically captures the current location of the camera. All this information along with the photo / video is uploaded to the server, which is alerted in the Pune CCTV Command Center within 30 seconds.

This app has been developed by Allied Digital Services Ltd.

Description:

1. **“Satark Punekar”** Mobile Alerts – Android based mobile application: This application can be installed on the android based smart phones, and is used for sending alerts to the Pune CCTV Command Center.

The application has one time registration after installation. Following screen shows the registration screen.

2. After installation, when you execute the application for the first time, the above registration screen will appear. The IMEI number of mobile handset is automatically read by the application. User has to enter the mobile number and Aadhaar Number (Optional) if available in the respective columns. After entering the details, click on “Register” button. The details are stored on the mobile phone, for further usage.

This screen shows the registered mobile number, the IMEI number and the Aadhaar card number.

3. Additionally, it also shows the current latitude and longitude of the mobile phone. These are used for locating the area from where the alert was received by the server. The center portion of the screen is for showing the captured image or video. At the bottom, there are three buttons -

- Take Photo button is used to click a photo.
- Capture Video is used for capturing video clip. The user can use this for capturing incident on photo or a short video clip.

After the incident is captured, the user can optionally type short description of the event. The default description is “Urgent attention required.”.

The “SEND” button is used for sending the alert to the Pune CCTV Command Center.

4. **Disclaimer** - This disclaimer should be a pop-up message after clicking on "Send".

After clicking “ACCEPT” Button, the captured image or video is uploaded to Pune CCTV server along with the details of the phone such as the mobile number, IMEI number, Aadhaar card details, latitude, longitude and description. Clicking the Back button exits the application.

5. “Alert Sent Successfully” message appears; this indicates Information has been send successfully from the “Satark Punekar” Mobile Alert.
